

Figure 1. This figure shows the response proportions and drift rates as a function of number of asterisks for Experiment 5 (Numerosity discrimination). The “Gs” represent responses in the Go/no-go task, the “2s” represent the responses in the two-choice task, and the “Ds” represent the drift rates.

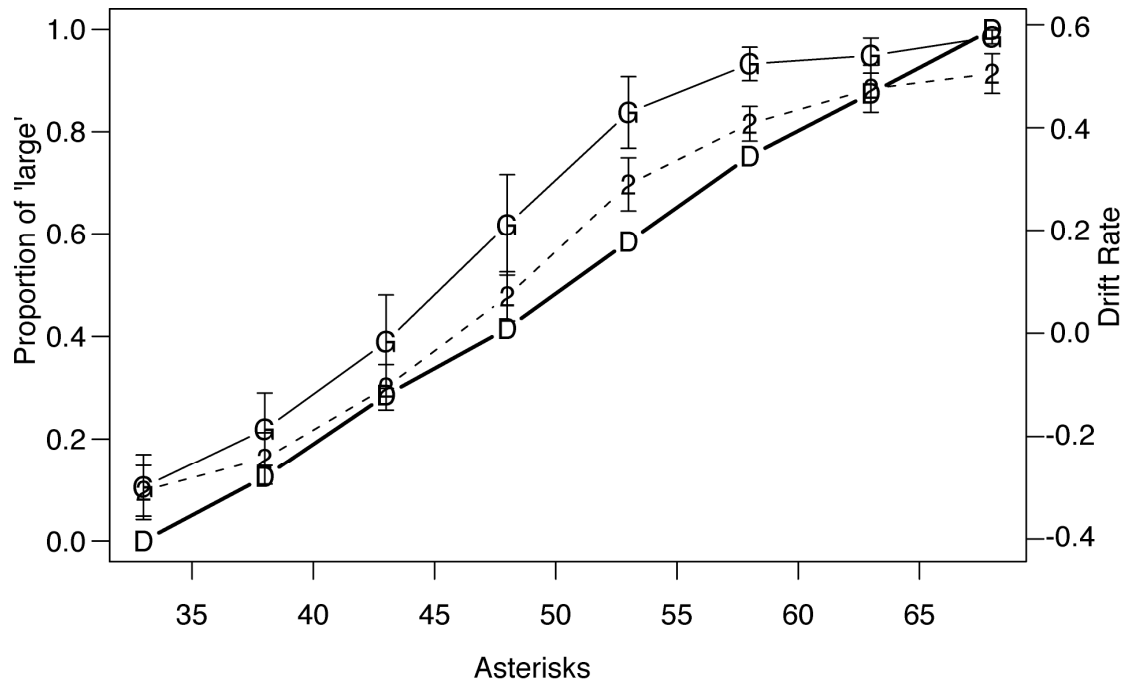

Figure 2. The Figure shows the proportion of “old” responses for new and old items in the go/no-go and two choice tasks.
